E. LUCY BRAUN AWARD

E. Lucy Braun was an eminent plant ecologist and the first woman president of the Ecological Society of America. Besides describing and mapping the deciduous forest regions of eastern North America, Lucy Braun served as a dedicated teacher and role model to her students. To honor her, this award is presented to a student for the outstanding poster presentation at the Society’s Annual Meeting.

The 2001 winner of the E. Lucy Braun Award is Antonio J. Golubski for his poster “Multiple partners: possible impacts on mycorrhizal community dynamics and diversity,” based on his current doctoral research at the University of Illinois at Chicago under the supervision of John Lussenhop. Antonio’s presentation was described by Braun judges as “A modeling study addressing an important and timely issue of consequences of dual colonization by two mycorrhizal fungi for plant competition,” and as “A very well done and sophisticated presentation. A theoretical extension of previous models that has broad relevance to many symbiotic interactions.” Antonio received his bachelor’s degree from the University of Miami, Florida.

Receiving an honorable mention is Matthew J. St. Pierre of the University of Iowa for his poster, “Dispersal patterns of Chrysochus auratus in a highly fragmented landscape.”

Braun Awards Selection Committee: Paul Marino (Chair), Cindy Pasczkowski, Christopher Sacchi, Bill Tonn, Mark Twery, Alan Yeakley

CONSERVATION ECOLOGY

A peer-reviewed, independent journal on the Internet

Conservation Ecology is supported by a dues-paying, international alliance of research institutions studying ecological resources, services, and policy. Dues underwrite all publishing costs, provide resources for Web-based courses and research, and money to develop and maintain unique Web-based peer review, manuscript tracking, and publishing software. The journal is published by the RESILIANCE ALLIANCE, composed of the Ecological Society of America and groups at Carleton University (Canada), CSIRO Ecology (Australia), Emory University (Georgia), University of Florida (Florida), International Institute of Agricultural Policy (Minnesota), International Institute of Applied Systems Analysis (Austria and Poland), University of Wisconsin (Wisconsin), Stockholm University (Sweden), and University of Zimbabwe/WWF (Southern Africa).

Conservation Ecology invites:

- **Readers:** to subscribe without fee and receive advance announcements and subscriber-only benefits. <http://www.consecol.org/Journal/subscribe/>

- **Authors:** to submit novel, integrative papers about people, populations, ecosystems, and landscapes across scales, for a multidisciplinary audience of scientists, scholars, and practitioners. <http://www.consecol.org/Journal/submit/>

- **Subscribers:** to submit proposals for innovative uses of the Web and Conservation Ecology, to further its goal of conversations about complex ecological, economic, and social issues. <http://www.consecol.org/Journal/vol2/iss1/art6/>
